

JUANITA HIGH SCHOOL

Syllabus Descriptions

Grade 9

English Language

Pre-AICE, Course 0500

This course enables learners to communicate clearly, accurately and effectively in both speech and writing. Learners use a wide range of vocabulary, and the correct grammar, spelling, and punctuation. Students learn how to employ a wide range of written forms for a variety of purposes, develop a personal style and an awareness of the audience. Learners are also encouraged to read widely, both for their own enjoyment and to further their awareness of the ways in which English can be used. Class skills include synthesis, inference, and the ability to order facts and present opinions effectively.

Further information about this course may be found at:

<http://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-igcse-english-first-language-0500/>

IGCSE Mathematics

Pre-AICE, Course 0580

An essential subject for all learners, Cambridge IGCSE Mathematics is a fully examined course which encourages the development of mathematical knowledge as a key life skill, and as a basis for more advanced study. The syllabus aims to build learners' confidence by helping them develop a feel for numbers, patterns and relationships, and places a strong emphasis on solving problems and presenting and interpreting results. Learners also gain an understanding of how to communicate and reason using mathematical concepts. Further information about this course may be found at:

<http://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-igcse-mathematics-0580/>

Mathematics – Year 1

AICE, Course 9709

Cambridge International AS and A Level Mathematics build on the skills acquired at Cambridge IGCSE (or equivalent) level. The topics of study during year 9 are coordinate geometry, exponent and root properties, functions and their graphs, quadratics, an introduction to differentiation, arithmetic and geometric sequences, the binomial theorem, beginning trigonometry, and an introduction to integration. Further information about this course may be found at:

<http://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-international-as-and-a-level-mathematics-9709/>

Combined Science

Pre-AICE, Course 0653

Cambridge IGCSE Combined Sciences gives learners the opportunity to study Biology and Chemistry, each covered in separate syllabus sections. Learners gain an understanding of the basic principles of each subject through a mix of theoretical and practical studies, while also developing an understanding of the scientific skills essential for further study. They learn how science is studied and practised, and become aware that the results of scientific research can have both good and bad effects on individuals, communities and the environment. As well as focusing on the individual sciences, the syllabus helps learners to understand the technological world in which they live, and take an informed interest in science and scientific developments. Further information about this course can be found at:
<https://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-igcse-science-combined-0653/>

History

Pre-AICE, Course 0470

The Cambridge IGCSE History syllabus investigates some of the major international issues of the nineteenth and twentieth centuries, analyzing the history of particular regions in more depth. The emphasis is on both historical knowledge and on the skills required for historical research. Learners develop an understanding of the nature of cause and effect, continuity and change, similarity and difference and find out how to use and understand historical evidence as part of their studies. Cambridge IGCSE History will stimulate any learner already interested in the past, providing a basis for further study, encouraging a lifelong interest in the subject. Both coursework and non-coursework options are available. Further information about this course may be found at:

<http://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-igcse-history-0470/>

Grade 10

English Language

AICE, Course 9093 (AS Level)

Cambridge International AS Level English Language gives learners the opportunity to study English language and its use in contemporary communication. It aims to encourage a critical response to texts in a range of forms, styles and contexts, and to promote skills of communication, reading, research and analysis. Through their study, learners develop an ability to read and analyze material, gaining further knowledge and understanding of English language features and issues. They also develop an ability to write clearly, accurately, creatively and effectively for different purposes and audiences. Further information about this course may be found at:

<http://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-international-as-and-a-level-english-language-as-and-a-level-from-2014-9093/>

Mathematics – Year 2

AICE, Course 9709 (AS Level)

This course is a continuation of Pure Mathematics – Year 1. At the end of this course, students will sit for two papers: Paper 1 - Pure Mathematics 1 and Paper 5 – Probability and Statistics.

Topics of study for the completion of AS level are: logarithmic and exponential functions, trigonometry, differentiation, integration, numerical solution of equations, and advanced algebra. The topics for Probability and Statistics are: representation of data, permutations and combinations, probability, discrete random variables, and the normal distribution. Further information about this course may be found at:

<http://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-international-as-and-a-level-mathematics-9709/>

Physics

Pre-AICE, Course 0625

The Cambridge IGCSE Physics syllabus helps learners to understand the technological world in which they live, and develop an informed interest in science and scientific initiatives. They learn about the basic principles of Physics through a mix of theoretical and practical studies. Learners also develop an understanding of the scientific skills essential for further study at Cambridge International A Level, skills which are useful in everyday life. As they progress, learners gain an understanding of how science is studied and practiced, and become aware that the results of scientific research can have both positive and negative effects on individuals, communities and the environment. Further information about this course may be found at:

<http://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-igcse-physics-0625/>

Global Perspectives

AICE, Course 9239 (AS Level)

Cambridge International AS Level Global Perspectives prepares learners for positive engagement with the rapidly changing world. Learners broaden their outlook through the critical analysis of, and reflection on, issues of global significance. The Cambridge International AS Level Global Perspectives syllabus is based on skills rather than on specific content. Learners develop research, thinking, reasoning and communication skills by following an approach to analyzing and evaluating arguments and perspectives called the Critical Path. The skills gained through study of Cambridge International AS Level Global Perspectives enable students to meet the demands of twenty first century learning and make a successful transition to study in higher education.

Further information about this course may be found at:

Grade 11

English Literature

AICE, Course 9695 (AS Level)

Learners following the Cambridge International AS and A Level English syllabus study a range of texts in the three main forms: prose, poetry and drama. Set texts are offered from a wide range of different periods and cultures. Learners develop skills of reading and analysis of texts, and are encouraged to undertake wider reading to aid understanding of the texts studied. They learn skills of effective and appropriate communication including the ability to discuss the critical context of texts. Further information about this course may be found at:

<http://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-international-as-and-a-level-english-literature-9695/>

Mathematics – Year 3

AICE, Course 9709 (A Level)

This course is a continuation of Pure Mathematics – Year 2. At the end of this course, students will sit for two papers: Paper 3 – Pure Mathematics 3 and Paper 4 – Mechanics.

Topics of study for this A Level course include a more advanced study of AS Level concepts. In addition, learners will also cover vectors, differential equations, and complex numbers. For Mechanics, the topics covered are: forces and equilibrium, kinematics of motion in a straight line, momentum, Newton's laws of motion, and energy, work, and power. Further information about this course may be found at:

<http://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-international-as-and-a-level-mathematics-9709/>

Chemistry

AICE, Course 9701 (AS/A Level)

Cambridge International AS and A Level Chemistry builds on the skills acquired in Combined Science. The syllabus includes the main theoretical concepts which are fundamental to the subject, a section on some current applications of chemistry, and a strong emphasis on advanced practical skills. Practical skills are assessed in a timetabled practical examination. The emphasis throughout is on the understanding of concepts and the application of chemistry ideas in novel contexts as well as on the acquisition of knowledge. The course encourages creative thinking and problem-solving skills which are transferable to any future career path. <https://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-international-as-and-a-level-chemistry-9701/>

JUANITA HIGH SCHOOL

History: United States (with Government): 1840-1941 *AICE, Course 9389 (AS Level)* Cambridge International AS Level History constitutes the first half of the Cambridge International A Level course in History and therefore provides a suitable foundation for the study of History at Cambridge International A Level and for related courses in higher education. Depending on local university entrance requirements, it may permit or assist progression directly to university courses in History or some other subjects. It is also suitable for candidates intending to pursue careers or further study in Arts, Humanities and Social Science related areas, or as part of a course of general education. The Grade 11 course will cover such topics as Westward Expansion, the Civil War and Reconstruction, US Imperialism, and the 20's and 30's.

Further information about this course may be found at:

<http://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-international-as-and-a-level-history-9389/>

Grade 12

English Literature

AICE, Course 9695 (A Level)

Learners following the Cambridge International AS and A Level English syllabus study a range of texts in the three main forms: prose, poetry and drama. Set texts are offered from a wide range of different periods and cultures. Learners develop skills of reading and analysis of texts, and are encouraged to undertake wider reading to aid understanding of the texts studied. They learn skills of effective and appropriate communication including the ability to discuss the critical context of texts. Further information about this course may be found at:

<http://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-international-as-and-a-level-english-literature-9695/>

Biology

AICE, Course 9700 (AS/A Level)

Cambridge International AS and A Level Biology builds on the skills acquired in Combined Science. The syllabus includes the main theoretical concepts which are fundamental to the subject, current applications of biology, and a strong emphasis on advanced practical skills. Practical skills are assessed in a timetabled practical examination. The emphasis is on the understanding of concepts and the application of biology ideas in novel contexts as well as on the acquisition of knowledge. The course encourages creative thinking and problem-solving skills which are transferable to any future career path. Cambridge International AS and A Level Biology is ideal for learners who want to study biology or a wide variety of related subjects at university or to follow a career in science. Further information about this course may be found at:

<http://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-international-as-and-a-level-biology-9700/>

JUANITA HIGH SCHOOL

History: US and Cold War History: 1941-1991

AICE, Course 9389 (A Level)

Cambridge International A Level History provides a suitable foundation for the study of History or related courses in higher education. Equally it is suitable for candidates intending to pursue careers or further study in Arts, Humanities and Social Science related areas (such as Law), or as part of a course of general education.

The Grade 12 course includes topics such as the development of the Cold War, Civil Rights, and social and political topics of the 1950's – 1991. Further information about this course may be found at:

<http://www.cambridgeinternational.org/programmes-and-qualifications/cambridge-international-as-and-a-level-history-9389/>

Art and Design (Elective)

AICE, Course 9479 (AS Level)

The Cambridge International AS Level Art and Design syllabus considers expression and communication. Learners gain an understanding of visual perception and aesthetic experience, and the ways in which art and design creates a language of its own. Most of the work for this syllabus is practical or studio based, so that learners can develop their abilities of observation and analysis of the visual world, sensitivity, skill, personal expression and imagination. They also learn how to relate their skills to an enhanced knowledge of their own cultures, past and present, as well as an appreciation of practical design problems. For students in 11th and 12th grades.

Further information about this course may be found at:
